1600  
series

# Bellmont<sup>®</sup> 1600 series

cabinet co.

Bellmont 1600 meets budget boundaries without compromise to style and construction quality.

Great products don't have to cost a lot. Bellmont 1600 is engineered to include luxury touch features such as soft close drawers and doors. Storage is maximized with full extension dovetailed drawers and full access frameless construction. Even our wood doors exhibit finely detailed finishes typically found in much more expensive cabinetry.

So choose a trend-setting urban style, or a transitional blend, or even a tried and true classic, and be assured you're getting great cabinetry you'll love living with.

Bellmont 1600:  
Durable & Green

Bellmont Cabinet Co. is an environmentally sensitive manufacturer that not only adheres to strict, sustainable processes and practices, but also uses eco-friendly cabinet case construction materials.

Bellmont 1600 white and optional maple wood grain case construction materials are durable and easy to maintain. These surfaces are bonded to 5/8" industrial grade particleboard. This particleboard carries the Environmentally Preferred Product (EPP) certification, is 100% recycled or reclaimed wood content, and is certified to the US strictest ultra low formaldehyde emissions by meeting current California Air Resource Board (CARB Phase II) requirements.

Bellmont 1600 also offers an optional 5/8" Birch plywood with a durable UV cured clear top coat. This plywood provides a luxury interior look, is extremely durable and easy to clean, and meets current CARB Phase II requirements for ultra low formaldehyde emissions. With this option, all 5/8" box components (sides, tops, bottoms, shelves) will be plywood.

Standard: White melamine bonded to 5/8" industrial-grade particleboard case construction and shelves; solid color PVC banding on all case edges; real wood veneer banding on finished sides.

\*Options: 5/8" maple melamine particleboard and 5/8" birch plywood interiors.

## Bellmont 1600 Featured Wood Species

Bellmont 1600 wood doors are constructed with character grade hardwoods. Depending upon the species, this grade could randomly exhibit mineral streaks, slight color variation, pin knots, and sap wood. These are naturally occurring characteristics of all hardwoods, and are not considered defective or inferior. Mid to darker tone stains will mask some of these mild variations, whereas a natural or clear finish will expose the wood's full grain and character.

All wood doors are finished with our multi-step stain processes, and protected with multiple coats of eco-sensitive catalyzed conversion varnish top coat for long lasting durability.

### ALDER\*

Native to the Pacific Northwest, Alder has fine, smooth, straight grain with random mineral streaks and mild color variation. Even though it is classified as a hardwood, Alder is slightly softer than woods such as Cherry or Oak; an excellent wood choice for most door styles and colors.

### CHERRY

Associated with fine furniture for centuries, Cherry is an eastern grown hardwood that exhibits fine, tight grain and mild color variation. Small random pin holes or pitch pockets are common. Cherry darkens with age turning reddish brown in overall tone. Darker stains mask the color change.

### MAPLE

One of the denser and harder of common cabinet woods, Maple shows tight smooth grain patterns. Common to Maple is the occasional dark mineral streak and mild color variation. Maple tends to yellow with age and light exposure. Good for light toned traditional or contemporary cabinetry.

### RED OAK

Oak is known for its coarse texture, predominant contrasting grain patterns, pin knots, and overall hardness. Color variations of light brown to reddish brown are typical and show the most with light or natural finishes. Oak is a timeless American classic wood.

\*Also available in Rustic Alder which will exhibit random knots and grain variation.

## Bellmont's Glazing Process

Glazing is a hand-rubbed contrast color application process that provides an old-world or 'antiqued' finish look by accentuating details and open grain on stained wood. Glazing is only applied to the front surfaces of doors and drawer fronts; the back side of doors and drawer fronts will only have the base stain color and clear top coating. Due to the hand applied processes, the final finished appearance may vary slightly from the sample.

**Bellmont Cabinet Company builds responsibly as active stewards of our environment.**

It's an extension of our holistic approach to business. Our manufacturing facility is certified as a member of the Environmental Stewardship Program administered by the Kitchen Cabinet Manufacturers Association. As members, we are required to meet or exceed stringent criteria in:

- Control of air quality and emission levels
- Use of 3rd party certified and sustainable woods
- Use of energy efficient machinery and processes
- Management of recycling waste materials
- Participation in local and international social stewardship

We are proud to utilize Environmentally Preferred Products for our standard case construction materials. These are particle board panel materials that are 100% recycled or reclaimed content, and meet California Air Resource Board CARB II compliance; the strictest standards for formaldehyde emissions in the world.
